Panchayaths

CoMPT- MKSP

GOVERNMENT OF KERALA

**MONITORING & EVALUATION
FRAMEWORK**

MONITORING AND EVALUATION FRAMEWORK

Web based MIS and real time input-output monitoring at various levels:

The DPR is prepared by mapping the entire paddy cultivating fields in the project districts. All of the available data about paddy collectives and machinery is placed in a GIS format. Now any quantifiable progress in the field can be easily communicated to PMU and marked in the GIS frame work.

The plan is to link this frame work to a web based system so that real time data about cultivation and the related activities can be viewed by the participants, other stake holders and the public.

Review Mechanism

Advisory committees at Panchayat and Block levels.

There will be an advisory/monitoring committee at Gram Panchayat level and Block Panchayat level consisting of Panchayat Chairpersons, officials of the related line departments – agriculture, diary, animal husbandry, extension and irrigation, Kudumbashree CDS Chairpersons and charge officers, representatives of the PMU and lead bank representatives.
